

TAA/GSA Compliance Statement for IMC Networks

IMC Networks' complete line* of fiber connectivity solutions proudly displays a "Made in USA" label. This label ensures that these products are assembled in the USA and are approved for purchase by the United States Government under the guidelines issued by the TAA. These products are also fully compliant with GSA Schedules.

TAA refers to the Trade Agreements Act (19 U.S.C. & 2501-2581), which is intended to foster fair and open international trade. TAA requires that the U.S. Government may acquire only "U.S. – made or designated country end products. This act requires that contractors must certify that each end product meets the applicable requirements. End products are 'those articles, materials and supplies to be acquired for public use'." This includes items which have been "substantially transformed" in the United States.

Sincerely,

A handwritten signature in black ink, appearing to read 'JR', is written over a faint, larger version of the signature.

Jerry Roby
Chairman/CEO
IMC Networks

** Stand-alone power supplies and SFP transceivers are not TAA compliant*
